

Selecting The Right OUTDOOR SPORT TILES

by FLEX COURT®

Selecting the right FLEX COURT® Tile for the right application is obviously very important!

Flex Court International offers two (2) different surface textures.

ProStep™ Tile

The ProStep™ Sports Tile by FLEX COURT® is the original outdoor tile with a more aggressive surface texture and designed for more aggressive players where serious injury avoidance due to slippery surfaces is paramount. It is the most popular sports tile available due to its superior traction.

ProStep™ is designed for every sport including, but not limited to, Basketball, Badminton, Multi-Game, Paddle Tennis, Pickleball, LaCrosse, Deck Hockey, Soccer, etc.

ProStep™ is the premier choice for an All-Weather Tennis Court. Ball bounce is excellent, closely resembling clay court characteristics, and the quick-drying surface offers more available playing time than hard courts in areas with frequent wet conditions. ProStep™ is available with No Maintenance Inlaid Sports Lines.

SoftStep™ Tile

The SoftStep™ Sports Tile by FLEX COURT® was designed for smaller children and less aggressive players in mind. It has an abrasive free surface texture with effective intermediate traction points. It is a great Multi-Game Court Surface with dryer weather in mind, great for a family oriented recreation surface.

The lower friction on SoftStep™ makes this surface a preferred choice for Outdoor Inline Hockey.

SoftStep™ is also the preferred choice for Shuffleboard Courts.

Both products offer the same important flexion characteristics to extend your playing time and comfort by eliminating much of the jarring impact inherent in hard surface courts. Play longer with more comfort!
