

CONCRETE PAD SPECIFICATIONS

- Thickness = 3" up to 1000 sq. ft. and 4" on larger courts
- Use Fiber Mesh instead of steel rebar
- ½" Saw Cuts = every 10'
- Slope = 1" over 10'
- Surface Finish = Light - Medium Broom
- Edge Finish = Straight
- Grade soil thoroughly
- Pack 3" of top soil or sand before pouring

Note: If Basketball Goals are located inside pad, a minimum 3'x3'x3' section of concrete is required using four (4) 3/8" x 2' Steel Rebar evenly spaced vertically in the whole before pouring the cement.

**** If any Court Components are located inside the pad, anchors and/or ground sleeves must be placed in the pad prior to pouring cement.**

Tip: Squaring your concrete Pad – Measure these points to ensure each point is the same length.
