

ASPHALT PAD SPECIFICATIONS

- [] Typical Thickness = 3" (75mm)
- [] No extra seal coating for surface finish
- [] Slope = 1"(25mm) over every 10' (3m)
- [] Edge Finish Required

STRUCTURES OUTSIDE THE PAD:

****Sufficient Backfill Material must be prepared to support footings for court components****

Minimum 36"(1m) level ground must exist to support footings for basketball goals, fencing, court lights, sports nets and any other court components to be installed outside the pad. Add a minimum 12" (25cm) of additional level ground for any special or extended backboard overhangs.

STRUCTURES INSIDE THE PAD:

If basketball goals are located inside pad, a minimum 3'x3'x3' section of concrete is required using four (4) 3/8" x 2' steel rebar evenly spaced vertically in the whole before pouring the cement.

If any court components are located inside the pad, anchors and/or ground sleeves must be placed in the pad prior to pouring cement.
